

FlairPak vacuum pouches are made with 9-layer coextruded films and are compatible with most industrial chamber machines. A versatile solution for both food & nonfood applications, FlairPak pouches maintain a tight, reliable vacuum for an oxygen-free environment. Coupled with exceptional contact clarity for clear product visibility, FlairPak pouches extend freshness while adding premium shelf appeal.

Available in an extensive range of sizes & thicknesses through our stock program, FlairPak is inventoried at each of Flair's warehouses to offer lower minimums & faster lead times. For unique requirements, our experts are available to collaborate with you to customize solutions for your specifications.

Special Characteristics

- Compatible with commercial vacuum chamber machines
- Exceptional seal strength & durability
- Superior contact clarity
- Suitable for frozen applications
- Custom services for surface printing & specialty applications, including sous vide

FlairPak® 300

2.8 mil thick, suitable for a variety of products & applications. Available with standard safe-handling instructions, surface printed in blue.

FlairPak® 400

3.7 mil thick, enhanced durability for heavier products & harsh conditions

FlairPak® 500

4.7 mil thick, puncture-resistant durability for heavy products & aggressive conditions

Pre-Zippered

3 mil standard barrier & 4 mil high barrier thicknesses, with open bottom for filling and hang hole for convenient product display.

Clear Front/Printed Back

High clarity front for crystal clear product visibility, combined with solid gold or black back for high contrast, eye-catching product display.

* FlairPak is available in over 65 sizes. Please consult a Flair expert for size and film specifications.

Market-Driven & Customer-Focused Innovation, Since 1992
